

# The digital copy of your thesis

Please read this information carefully. It provides a brief summary of the main issues surrounding digital theses of which research students should be aware. For further information see [www.ouls.ox.ac.uk/ora](http://www.ouls.ox.ac.uk/ora)

## Oxford Digital Theses

The University of Oxford is committed to the dissemination of its research 'for the benefit of society and the economy' (University Strategic Plan 2008-13, para 70) and in support of this commitment provides ORA (Oxford University Research Archive).

ORA is an online archive of research materials, including digital copies of theses created in fulfillment of University of Oxford awards. There are a number of benefits to storing your thesis in ORA including:

- **Maximised visibility** for you and your research
- **Persistent links** to your thesis, i.e. links which won't 'die' and which can be used when citing your thesis
- **Digital preservation** of the electronic copy of your thesis.
- **Easy access** for readers to the full text of freely available theses
- **Participation in EThOS** the new UK thesis service at the earliest opportunity (for D.Phil., D.M. and D.Clin. Psych.).

## Before you start writing

There are a few things that it is helpful to think about before you start writing your thesis. See particularly the sections below on third party copyright, journal articles and fonts.

## D.Phil., M.Litt. and M.Sc.(by Research)

Students admitted on or after 1 October 2007 and successfully completing the D.Phil., M.Litt. and M.Sc.(by Research) programmes are required to deposit a print **and** a digital copy of their thesis. The digital copy should be deposited by the author in ORA. See [www.admin.ox.ac.uk/examregs/contents.shtml](http://www.admin.ox.ac.uk/examregs/contents.shtml)

## Voluntary deposit

Students completing D.Clin.Psych, M.Phil.(in Law), Master of Studies in Legal Research (M.St.) or Bachelor of Philosophy (B.Phil.) in Philosophy are invited to deposit a digital copy of their thesis in ORA.

## Access to your thesis

For academic programmes requiring deposit of the thesis, the hardbound copy will be stored in the Bodleian Library. Visitors to the library will be able to read your thesis on site. Digital copies held in ORA will be made freely

available via the Internet. In the future, digital copies of Oxford D.Phil, D.Clin. Psych. and D.M. theses will most probably be included in the British Library's EThOS service (see below). Any theses which have been granted dispensation from consultation (see below) are unavailable to readers either at Oxford or via the British Library.

## When to deposit your e-thesis

You may only deposit your e-thesis AFTER you have been granted leave to supplicate

## Version

The deposited digital copy should be the finalized copy of the thesis, as approved by the examiners.

## Journal articles within the thesis

Increasingly authors include copies of journal articles as part of their thesis. Authors needing to do this can make the article freely available via the Internet as part of their thesis only in compliance with copyright permissions. Many publishers are happy to grant such permission. See ORA copyright guidance at [http://www.ouls.ox.ac.uk/ora/oxford\\_etheses](http://www.ouls.ox.ac.uk/ora/oxford_etheses) for more information.

## Dispensation from consultation

There may be good reasons why all or parts of your thesis cannot be made publicly available. For example, it might contain confidential, sensitive or commercial information, infringe copyright, or there may be concerns about pre-publication. If this is the case you should apply for total or partial dispensation from consultation using form GSO3C available from the Graduate Studies Office. Contact your supervisor or Research Services if you are unsure about these matters. Humanities students please see Humanities Division section below.

## Publication of your thesis

The general trend is that theses are becoming freely available via the Internet. Authors may well reach a wider audience by making the thesis electronically available in thesis form than by publishing it subsequently in other ways. The balance of advantage will vary from case to case. However during this period of transition, authors need to be fully informed of factors that affect the decision as to whether to restrict access to their thesis. Authors can then judge the many advantages of open access to their thesis against implications for the ability to publish all or parts of the work as a monograph, journal article or in some other format at a later date. Publishers

differ in respect to their policies on this issue. You are advised to discuss this matter with your supervisor. See guidance on pre-publication concerns at

[http://www.ouls.ox.ac.uk/ora/oxford\\_etheses](http://www.ouls.ox.ac.uk/ora/oxford_etheses)

### The copyright in the thesis

The copyright in the thesis usually remains with the author. In a tiny minority of cases, copyright might rest with a sponsor or other body. Please speak to your supervisor or Research Services if you are unsure.

### Third party copyright

If you have incorporated material within the thesis where copyright is held by an individual or group that is not the author (third party copyright) you will need permission to make such material freely available on the Internet. It is best to obtain permission when sourcing the material. You need to provide proof of permission when depositing your thesis in ORA (eg email or letter).

### Intellectual property rights

If consultation or reproduction of all or part of the thesis would put at risk **confidential material** or invalidate an application for a **patent** on a product or process described in the thesis, or restricting access to the thesis is a requirement of any **agreements with an outside body or sponsor** governing supply of confidential material or the disclosure of research results described in the thesis, you should apply for dispensation from consultation. Please speak to your supervisor or Research Services for advice.

### Open and restricted access

As a result of Dispensation from Consultation permissions, different levels of access can be set for digital theses:

1. Open access – freely available content
2. Closed access – all restricted
3. Item record available/Full content restricted (with or without abstract)
4. Partially available – some content freely available

The period of restricted access should be indicated on the ORA deposit form.

### Humanities Division

The Humanities Division strongly supports open access to and wide dissemination of theses produced by its students. During this period whilst both authors and publishers adapt to open access, the Division has agreed that by default, access to the full text of digital theses will be restricted for three years. Authors should indicate as such on the ORA online deposit form. Students need not apply for restricted access using form GSO3C. Authors can choose to override this default and make their thesis open access either at deposit or at any

time during the three year embargo. Students who wish to make their thesis freely available on deposit or before the end of the three years should indicate as such on form GSO3A and on the online ORA deposit form. **All** students need to indicate if their thesis contains content where copyright is held by a third party. Humanities Division information is at [http://www.humanities.ox.ac.uk/graduate\\_study/current\\_students/ora/](http://www.humanities.ox.ac.uk/graduate_study/current_students/ora/).

### Fonts

Please use Unicode fonts. Be particularly careful that non-Roman characters and diacritics are created using Unicode. Common applications (eg MSWord Arial font) are usually Unicode compliant

### File size

For ease of deposit and dissemination we recommend that your files are smaller than 50Mb. If they are any larger, please contact [ORA@ouls.ox.ac.uk](mailto:ORA@ouls.ox.ac.uk) to arrange for an alternative method of deposit.

### File format

You may deposit your thesis in any file format. Please deposit two copies of your thesis

1. the original source version for preservation purposes which should not have any security settings.
2. a single PDF file for dissemination: this version can have security settings added

### ETHOS

ETHOS (Electronic Thesis Online Service) replaced the former UK thesis service in 2008. It is run by the British Library. ORA will be the means of submitting Oxford theses to this service. Publicly available digital copies of D.Phil., D.Clin.Psych and D.M. theses will be sent to ETHOS. Users will be able to access and download theses free of charge. There will be an option for users to obtain a printed copy or copy on CD-ROM for a fee. <http://ethos.bl.uk/>

### Plagiarism concerns

Making the thesis open access increases its visibility, gains recognition for the author and certifies them as author of the work. It can also give rise to concerns about increased risk of plagiarism. However, when work is available open access, plagiarism can be easier to detect. There is a widespread global trend to make theses open access.

### Contact details

For further information see [http://www.ouls.ox.ac.uk/ora/oxford\\_etheses](http://www.ouls.ox.ac.uk/ora/oxford_etheses). For other concerns contact [ORA@ouls.ox.ac.uk](mailto:ORA@ouls.ox.ac.uk) or 01865 283809 (office hours)
